

Update from Building Committee
November 13, 2011

Cheryl Jones reported at the November 13 church business conference that the Building Committee is working hard – almost daily with Shanks Architects. They have enlisted Mary Nash Walker and Meredith Recko to assist them on the interior design. They are working with Shanks' interior designer.

They took a field trip to Dallas this month to the architect's office to work on plans. They continue to work with the civil engineer, the structural engineer and the geo tech engineer.

Their hope and prayer is that they will have all the sufficient information to conduct church forums in January. Following the church forums a church vote will be held to approve the Phase 1 project. Other committee members are Jerry Gibson and Tresa McNeal with Bert Pope serving as our church representative. Please keep all of them in your prayers.
